

Mini Wallmount Enclosure

Mini Wallmount Enclosures

iFiber Optix Mini Wallmount fiber patch and splice enclosures can patch and splice up to 24 LC fibers and 12 SC fibers in single mode or multimode configurations. These enclosures can be supplied fully loaded with adapter panels, pigtails, a splice sleeve holder, and a pre-terminated stub cable or as a plug and play module with an MTP adapter or pigtails.

Features

- Easy to loosen thumbscrews to gain access to internal components
- Enclosures can be pre-terminated for patching only or supplied with a splice chip for patching and splicing capability
- Enclosures are wall mountable and are also rack mountable with optional rackmount brackets
